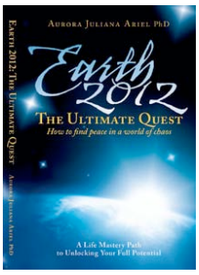
Pioneering Doctor Releases Breakthrough Counseling Technology

After years of research directly in the uncharted realms of the psyche, Aurora Juliana Ariel, PhD brings out her landmark discoveries and revolutionary Counseling Theory and Practice, TheQuest™



WAILEA, Hawaii – A pioneer in her field, Dr. Aurora Juliana Ariel has delved deeply into life's most sacred mysteries unlocking the potential of the soul and a higher destiny for humanity. Through TheQuest™, she provides a way that individuals worldwide can heal and transform their lives.

In her groundbreaking, critically acclaimed book, ***Earth 2012: The Ultimate Quest, How To Find Peace In A World of Chaos***, Dr. Aurora Juliana Ariel melds powerful psychology, breakthrough healing steps, and scientific predictions to show how our planet is emerging from a Dark Night into consciousness – and how we can individually unlock our full potential. Her belief, "When we heal our life, we change our destiny."

Dr. Ariel developed a revolutionary Self Counseling Technique that distills a powerful subconscious healing process into seven steps that are designed to accelerate personal healing. It is a remedy – and it is real. Driven workaholics, addicts, and those working off an old (and damaging) script have used TheQuest™ to self heal by reprogramming the subconscious.

Her heart for humanity has also translated into TheQuest™ Certificate Trainings under the Institute of Advanced Healing (a non profit she founded and heads), and the setting up of chapters to serve communities around the world. Her love for translating knowledge into inspired media productions led to the founding of AEOS, with a host of music, books, and films she is authoring, in progress and planned for release in the coming years.

A powerful visionary, Aurora's next intention: **To take Oprah through TheQuest™ 7 Steps** to show people around the world how easy it is to resolve issues, heal patterns, and change the challenging conditions of their lives.

TheQuest™ is part of a bigger picture, however. Drawing on parable and historical references, ***Earth 2012*** is a concise guide that carefully outlines the path to internal peace, but also explains the incredible passage humankind is in – an amazing time period in which an entirely new culture is emerging *en masse.*

Using science, research, and drawing on her psychological expertise, Dr. Ariel weaves a blend of sacred prophecies, scientific predictions, and visions centered around the year 2012, a very significant time period in which the Mayan calendar comes to an end. This magical year represents an unprecedented opportunity to turn the tide on our current challenging planetary conditions … and it is an opportunity for you to play a significant role in your own.

In the year 2012, the first rays of light will bathe Earth in glorious, widely prophesized potential: A profound, invisible shift that will affect the human psyche. The question is, will you be ready?
